Ugesh R

Data Engineer | Passionate Problem Solver | Freelancer | Azure |
PySpark, ADF, ADLS, Airflow | Databricks | Gen AI Enthusiast
Greater Coimbatore Area

Summary

Welcome to my world of data and creativity! As a Data Engineer with 3+ years of experience, I specialize in architecting and optimizing scalable data pipelines within the Microsoft Azure ecosystem. My expertise lies in leveraging Azure Data Factory (ADF), Azure Data Lake Storage Gen2 (ADLS Gen2), and Azure Databricks to deliver high-performance data solutions. I am proficient in PySpark, Apache Spark, and Spark SQL, enabling me to solve complex data ingestion and transformation challenges. My career is defined by driving cloud modernization. I have successfully migrated 35+ legacy ETL workflows (Informatica PowerCenter & SSIS) to cloud-native Azure environments, resulting in significant performance gains and cost efficiencies. I am skilled in implementing Medallion Architecture (Bronze/Silver/Gold) using Delta Lake and delivering analytics-ready datasets that empower data-driven decision-making.

Experience

Cognizant

3 years 6 months

Associate

October 2025 - November 2025 (2 months)

Working on migrating legacy SSIS workflows to a modern Databricks-based architecture using PySpark and SQL, and building cloud data pipelines using Azure services.

Convert SSIS packages into Databricks notebooks (PySpark/Spark SQL).

Develop and orchestrate end-to-end data pipelines using ADF.

Build ingestion and transformation workflows across on-prem and cloud.

Perform data validation, optimization, and quality checks.

Troubleshoot pipeline issues and ensure smooth migration.

Databricks | PySpark | Spark SQL | Azure Data Factory | Azure Data Lake | SSIS | SQL Server | Git

Program Analyst

November 2022 - October 2025 (3 years)

Coimbatore, Tamil Nadu, India

Wrote efficient SQL queries for data extraction, transformation, and loading across various environments.

Migrating codes and queries from informatica to Pyspark with databricks as a platform.

Used Power BI for basic data visualization and monitoring report generation.

Collaborated with data analysts and business teams to understand data requirements and ensure pipeline accuracy.

Tools/Stack: PySpark, SQL, Hadoop, Power BI, Git, JIRA

Tool Proficiency: WinSCP, MobXstem, and Github.

BigData Trainee

June 2022 - November 2022 (6 months)

Coimbatore, Tamil Nadu, India

My internship at Cognizant was a transformative experience that broadened my horizons in the tech industry. In the span of my internship, I achieved proficiency in several critical areas:

Python - SQL - Hadoop Ecosystem

This internship not only enhanced my technical abilities but also provided valuable insights into working with a team of seasoned professionals. I am sincerely grateful for this opportunity to learn, grow, and contribute to the field of technology.

The Reciprocal Solutions

1 year 6 months

Creative Designer

April 2021 - March 2022 (1 year)

Coimbatore, Tamil Nadu, India

During my tenure as a Designer at The Reciprocal Solutions, I had the privilege of working on a diverse range of creative projects, from graphic design to video editing and 3D modeling. Here's a snapshot of my contributions:

Graphic Design:

Crafted eye-catching festive posters that added vibrancy to special occasions.
Designed prize cards and logos that helped clients stand out in their industries.
Created persuasive pamphlets and brochures that conveyed key messages effectively.

Tools: Photoshop and Illustrator

Video Editing:

Produced engaging work demonstration videos that showcased products and services.

Developed 2D animation explainer videos that simplified complex concepts.
Crafted app tour videos that guided users through the functionality of mobile applications.

Tools: Premiere Pro and After Effects

3D Modeling:

Constructed detailed 3D models of architectural projects, including a house before construction and office setups for visualization.

Utilized AutoCAD and Lumion to bring architectural visions to life with precision.

My time as a freelancer at The Reciprocal Solutions was a testament to the power of creativity and versatility. I'm grateful for the opportunity to contribute to a wide array of projects and look forward to more exciting collaborations.

Junior Developer

October 2020 - March 2021 (6 months)

Coimbatore, Tamil Nadu, India

During my time as a Junior Developer at The Reciprocal Solutions, I had the opportunity to work on various web projects. I:

Created real-time static web pages to showcase clients' brands effectively.
Contributed to the development of dynamic websites that improved user experiences.

Used HTML, CSS, Bootstrap, PHP, and JavaScript to build these websites.
This experience enriched my web development skills and understanding, and I'm eager to continue growing in this field.

Education

SNS College of Technology

Bachelor of Engineering - BE, Computer Science · (2018 - 2022)
