EXPERIENCE

Data Engineer – Associate · Cognizant Technology Solutions

Jul 2022 – Present | Tamil Nadu, India

- Migrated 10+ Informatica PowerCenter mappings to Azure Databricks using PySpark and Spark SQL — improved pipeline performance and eliminated on-premise infrastructure dependency.
- Migrated 25+ SSIS-based ETL workflows to Azure Databricks using PySpark, Azure Data Factory and ADLS Gen2, enabling cloud-native scalability and automated incremental loads.
- Built and maintained ADF pipelines for orchestration, scheduling, and error handling across all migrated workloads.
- Developed PySpark transformation jobs on Databricks with Delta Lake storage for structured and semi-structured data at scale.
- Modelled bronze / silver / gold data layers in ADLS Gen2; validated schema mappings and business rules for data quality.
- Delivered analytics-ready datasets and Power BI reports for data scientists and business analysts.

Junior Developer – Intern · The Reciprocal Solutions

2021 – 2022 | Tamil Nadu, India

- Developed internal web application modules; created wireframes and site maps for a full website revamp.

PROJECTS

ADF + ADLS Gen2 End-to-End Pipeline ADF · ADLS Gen2 · Azure SQL

- Designed a complete ingest-transform-serve pipeline: raw data ingested into ADLS Gen2 via ADF, transformed in Azure SQL, and loaded to a reporting layer.

PySpark Transformation Pipeline on Databricks PySpark · Azure Databricks · Delta Lake · Spark SQL

- Built a batch pipeline to ingest, clean, and transform large-scale retail sales data on Azure Databricks, persisted in Delta Lake for downstream analytics.

EDUCATION

9.02 CGPA - B.E. Computer Science & Engineering · Anna University, Tamil Nadu · 2021
